Subj: MINUTES OF NAVAL RADIATION SAFETY COMMITTEE (NRSC)  
MEETING SECOND QUARTER, CY-2015

2. The following were my opening comments: I thanked everyone for their efforts with the very successful NRC biennial inspection of the MML. I believe that the teamwork displayed between all parties was reflected in the successful outcome, and warned everyone to remain vigilant in their preparations for the next inspection over the next two years. I also appreciated the efforts of the NRC, BUMED and DHA as we work through the permitting issues with DHA. I thanked NRC for their efforts in the ongoing conversations about the radium MOU and the MML MOU. I am looking forward to hearing the results of MML partner's meeting in August. Lastly, although not specifically related to the MML, we continue to appreciate everyone's efforts on Hunter's Point.
3. One specific item was carried forward from the previous NRSC meeting in October: DHA and OPNAV leadership were to have dialog as to a course of action with an MOU. This was completed during the last quarter. The action is closed, but work related to the DHA and OPNAV relationship will continue.
4. The incoming correspondence from the NRC during the past quarter was discussed by (b) (6)
  - a. Acknowledgement of Receipt Letter dated 05 Dec 2013, Control No 586148.
  - b. Acceptance of Notification of Loss of Material, Control No 03029462, dated 10 March 2015.
  - c. Acknowledgement of Receipt Letter dated 23 Mar 2015, Control No 586405
  - d. Acknowledgement of Receipt Letter dated 04 Apr 2015, Control No 586215.
  - e. Termination of Quality Assurance Program Approval for Radioactive material Packages No. 0697, Revision 5, dated 8 Apr 2015.
  - f. Acceptance of Notification Geotek Multi Spectrum Core Logger Safety Evaluation, Control No 586405, dated 9 April 2015.

MEETING SECOND QUARTER, CY-2015

11. NRC update: (b) (6) expressed appreciation for the continued cooperation between the Navy and NRC. He also expressed gratitude for the invitation to the RASP RSO conference in April. He mentioned that Virginia private shipyards are beginning to request information about ships affected by Fukushima scheduled for maintenance. (b) (6) also emphasized that while the inspection went well, NRC is concerned about succession plans for inspectors at RASO and NMCPHC since many of the inspectors are retirement eligible. Additionally, the MML partner's meeting is scheduled for 18-19 August 2015 and he expects productive discussions to be held about various issues which concern the Navy, to include electronic signatures and beginning a dialog on the potential for a DOD wide MML. (b) (6) informed the NRSC about his desire to accompany NMCPHC inspectors for their trip to Naval Medical Center San Diego. (b) (6) and (b) (6) will coordinate this trip.

12. I requested any additional input from around the room. (b) (6) introduced (b) (6) replacement, (b) (6) and stated SECNAVINST 5100.14E (DON Laser Protection Program instruction) has been pulled back to better facilitate incorporation of comments. (b) (6) stated that HQMC(SD) was getting a new director. There were no other comments. In closing, I stated that I appreciated the open and honest discussion and look forward to hearing the results of the MML partners' meeting.

13. The next meeting is tentatively scheduled for 9 Sept 2015.

14. The meeting adjourned at 11 (b) (6)
